DigiScape®

latex-saturated, wet-strength wallcovering print media

DigiScape® is a latex-saturated, non-woven wallcovering print media reinforced with synthetic fibers for strength and durability. DigiScape® is a superior alternative to PVC wallcovering materials. Its environmentally responsible construction supports two LEED credits. The product is dimensionally stable and tear-resistant with a bright white surface. Available for both paste and pressure-sensitive (PSA) applications.

AVAILABLE OPTIONS:

DigiScape® Smooth 350: Robust 17 pt material manufactured with a smooth matte print surface to reduce and improve ink adhesion.

DigiScape® Canvas 350: Robust 17 pt material manufactured with a canvas like texture to hide imperfections as well as to give the appearance of a true textile wallcovering.

DigiScape® Smooth 260: 9 pt material manufactured with a smooth matte print surface to reduce and improve ink adhesion.

DigiScape® II: A robust 17 pt material that is laminated to a non woven PET back. This durable construction exceeds the break and tear strength of the Type II commercial wallcovering specification.

DigiScape® Stick-R 260: Removable PSA with a release liner for easy peel and stick application. The product has a slight weave texture matte finish for added interest to the final print and to help cover surface imperfections.

Printability: UV, Latex, Heavy solvent, Solvent, Eco-solvent, Screen, Offset
