Discover an acrylic sheet that doesn't require an adhesion promoter prior to ink application.

Often, printers sacrifice the outstanding optical clarity of acrylic sheet for the good UV ink adhesion properties offered by other plastic sheet substrates.

Not anymore! Optix® DA eliminates the need for the costly and often time-consuming task of applying an adhesion promoter prior to printing. Produce high-quality, vibrantly colored prints with the UV curable inks that are utilized in today's UV digital flatbed printers.

Optix® DA Digital Acrylic Sheet

- Produced with a specially formulated acrylic polymer that promotes optimal adhesion of UV curing inks without the need for an adhesion promoter prior to ink application
- Developed and tested with a leading manufacturer of digital UV flatbed printers and various ink suppliers
- Available in clear, 7328 white and non-glare
- NEW OPTIX® E-DA, Erasable Digital Acrylic, has the same high-quality direct-to-print surface on one side as the original Optix® DA, with the added benefit of an abrasion- and chemical-resistant coating on the other. Perfect for contemporary marker board designs and applications where anti-graffiti properties are desired.

Contact Plaskolite for thickness and size availability.

OPTIX® Digital Clear Acrylic Sheet Properties

Physical Properties	ASTM Test Method	Units	Values
Specific Gravity	D-792		1.19
