

# AWNING TUBING & STAPLE SYSTEMS

# S&F AWNING TUBING

## *with Triple-Coated In-line Galvanized Coating*

The in-line galvanizing process provides a triple layer of corrosion protection that slows down the white rust growth process, the top layer of a clear organic polymer gives the tube superior corrosion resistance, adding aesthetic appeal, and long-lasting surface brightness.

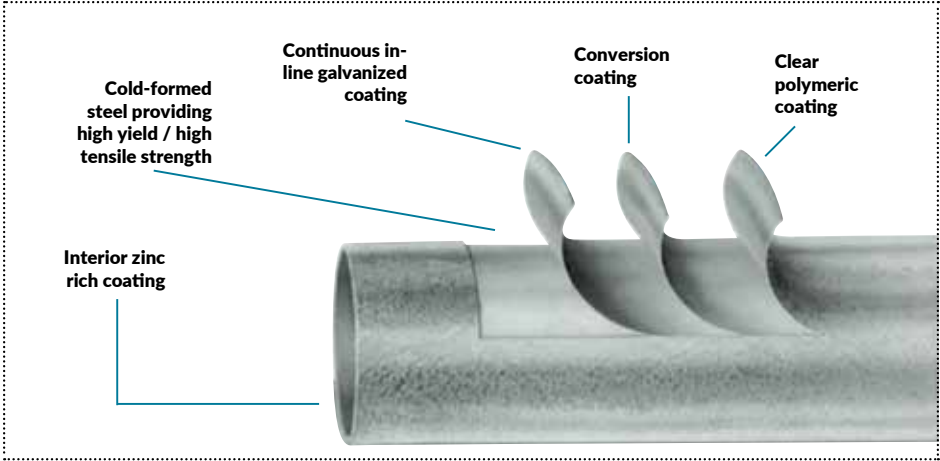

The result is a smooth, shiny end product appearance that is unmatched in terms of strength and durability – it will not oxidize or “gray down” with age, nor will the coating flake off during fabrication operations.

Triple-coated for superior corrosion resistance strength and long-lasting aesthetic appeal!

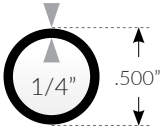

***All tubings shown in actual size***

## OTHER BRANDS

Pregalvanized products do not provide this “sealed” protection. The inside weld area is left bare – unprotected since the interior cannot be re-metalized. The exposed metal is immediately left to be attacked by all corrosive elements. The result is an unprotected and highly susceptible to corrosion, white rust and breakage.

## S&F FITTINGS AND VALVES

S&F carries a large selection of steel and aluminum fittings and valves. These fittings and valves are designed to be durable and tough and work for a variety of awning and marine applications. Visit [sfsupplies.com/awning-supplies/tubing-extrusions](https://sfsupplies.com/awning-supplies/tubing-extrusions) for the full list or simply scan this QR code.

# THE STAPLE SYSTEM

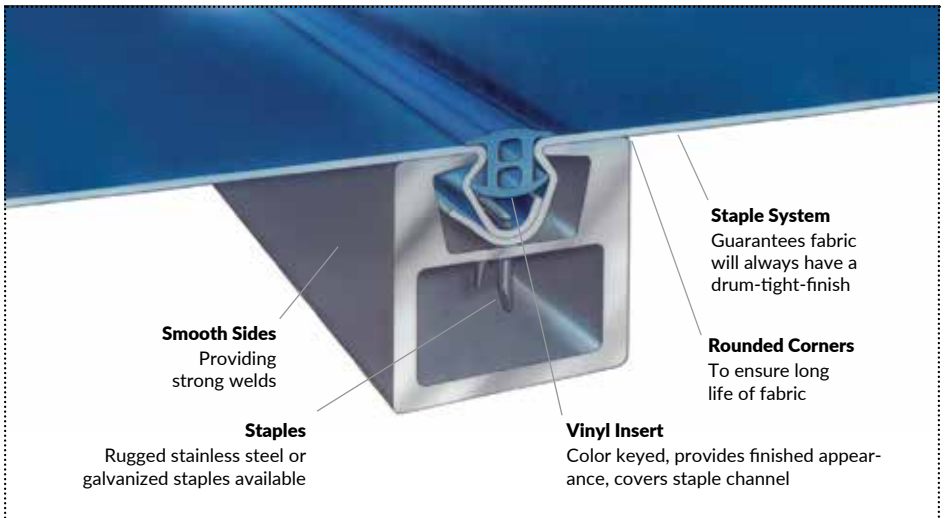

The Staple System Awning provides an alternative to other types of awning tensioning. It is possible to use almost any awning cover with the staple method. The cover is stapled to the frame, and then a vinyl insert is pushed into the staple groove in the framing system, leaving a drum-tight surface.

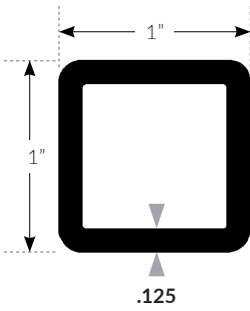

Replacement of awning covers is simplified and can most often be done without removing the awning by quickly and easily removing the vinyl inserts and the old cover, the new cover is stapled in place, the inserts are reinstalled or replaced and the job is complete.

Aluminum profiles are available in many types and are used in fabricating awnings, canopies, domes, signs, retrofit sign faces, fabric wells, displays and promotion centers.

Extrusions carry a 10 year warranty.

### MI-4

For internal structure and bows.

SKU: **AWSSMI4**

Length: 24'  
5/Bundle

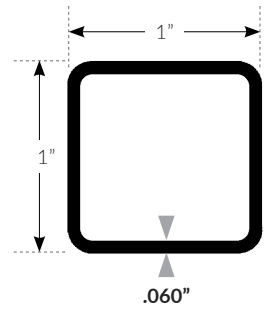

### MI-10

For internal structure and bows.

SKU: **AWSSMI10**

Length: 24'  
5/Bundle

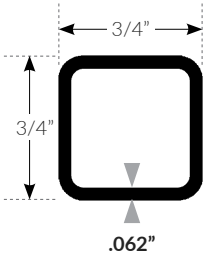

### MI-5

For internal structure and bows.

SKU: **AWSSMI5**

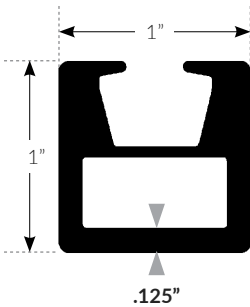

Length: 24'  
5/Bundle

### MI-75

SKU: **AWSSMI75**

Length: 24'  
5/Bundle

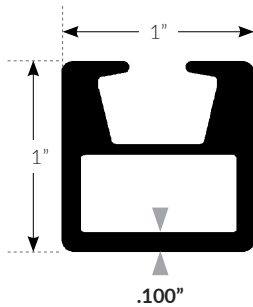

### MP-1

Heavy-duty  
Staple-In extrusion.

SKU: **AWSSMP1**

Length: 24'  
5/Bundle

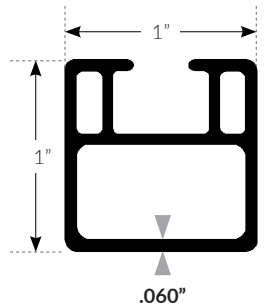

### MP1-A

Standard well  
Staple-In extrusion.

SKU: **AWSSMP1A**

Length: 24'  
5/Bundle

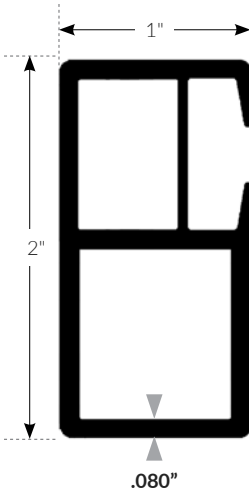

### MP-1C

Lighter duty  
Staple-In extrusion.

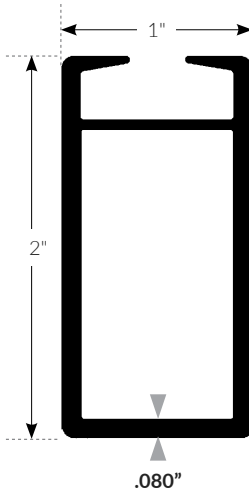

SKU: **AWSSMP1C**

Length: 24'  
5/Bundle

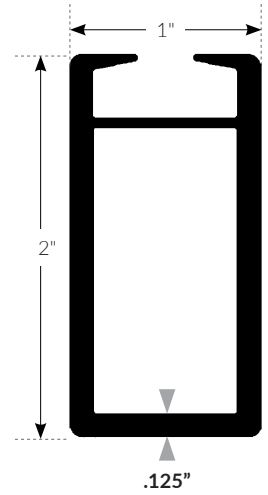

**MP-3S**

SKU: **AWSSMP3S**  
 Length: 24'  
 5/Bundle

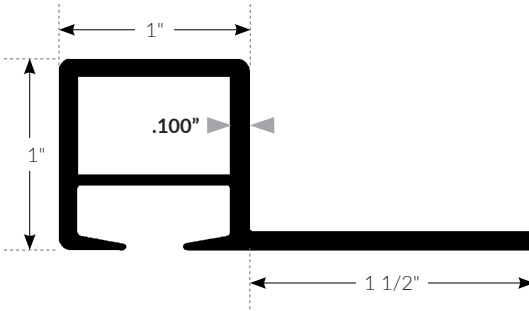

**MP-3**

SKU: **AWSSMP3**  
 Length: 24'  
 5/Bundle

**MP-3H**

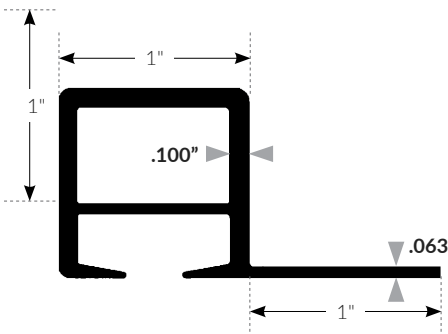

SKU: **AWSSMP3H**  
 Length: 24'  
 5/Bundle

**MP-2**

Use as larger awnings requiring heavy-duty flange for large areas of eggcrate.

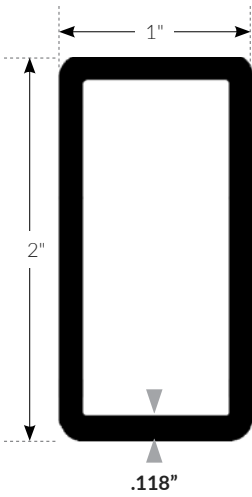

SKU: **AWSSMP2**  
 Length: 24'  
 5/Bundle

**MP-2A**

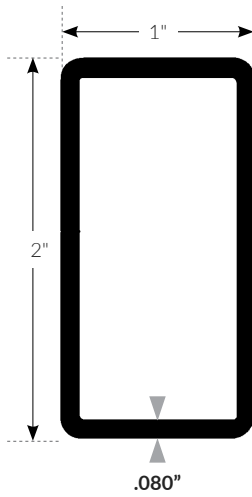

Use as bottom perimeter structural extrusion with eggcrate holder flange for awnings and signs without valance.

SKU: **AWSSMP2A** Length: 24'  
 5/Bundle

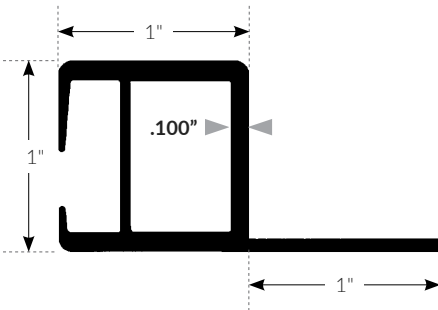

**MI-3H**

SKU: **AWSSMI3H**  
 Length: 24'  
 5/Bundle

**MI-3**

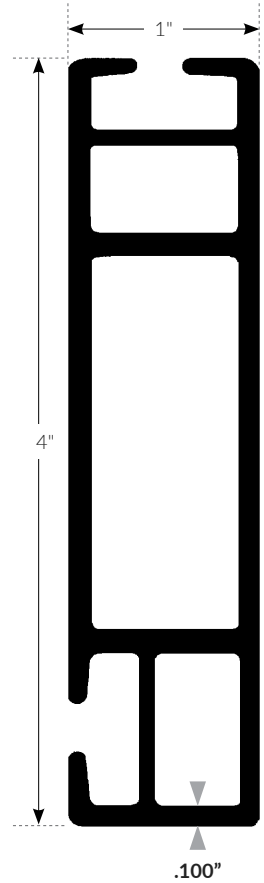

SKU: **AWSSMI3**  
 Length: 24'  
 5/Bundle

**MP-2B**

Use as bottom perimeter structural extrusion. Incorporates eggcrate holder flange for awnings with or without valance.

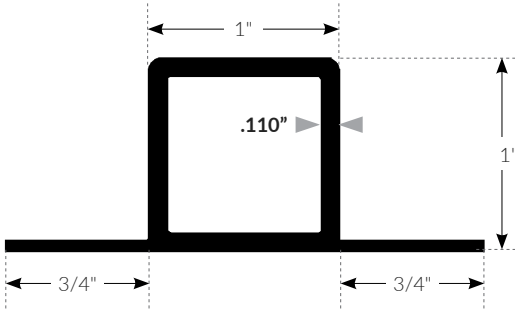

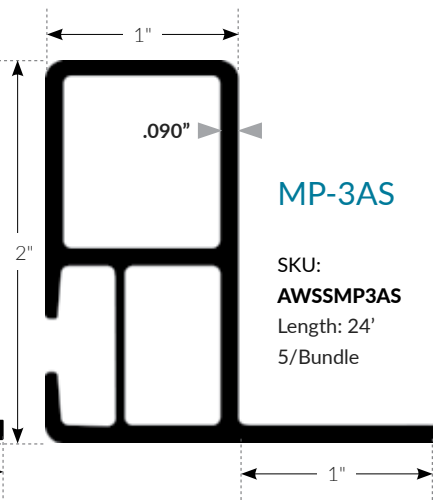

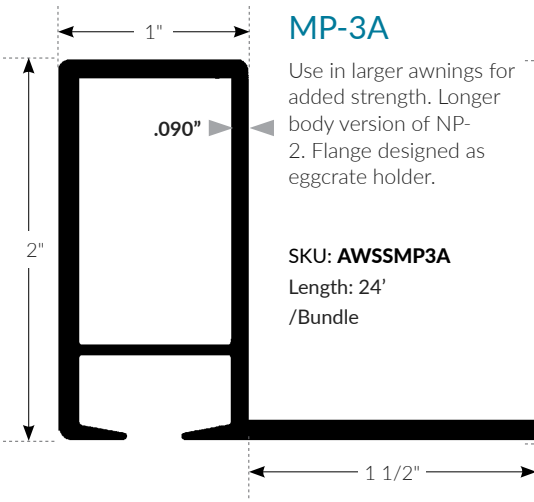

SKU: **AWSSMP2B** Length: 24' 5/Bundle

**MP-4**

"Truss Eliminator" Designed to free span long distances.

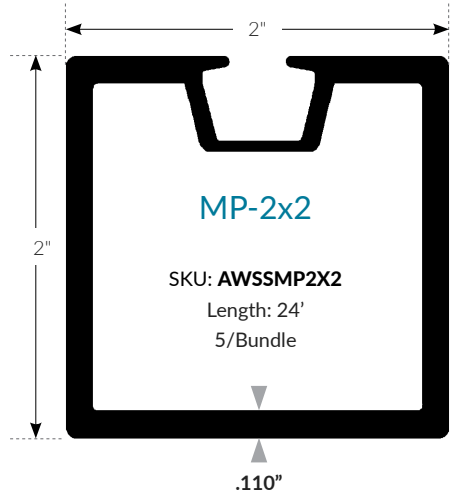

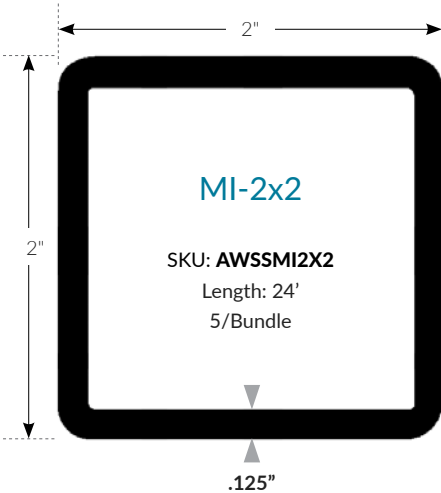

SKU: **AWSSMP4**  
 Length: 24'  
 5/Bundle

**MI-56**

Bottom structural internal outrod. With eggcrate holder flange.

SKU: **AWSSMI56**  
Length: 24'  
5/Bundle

## Zip Strip

Zip Strip vinyl trim Insert for Staple system is the perfect finishing item for awnings. Made with maximum UV and mildew inhibitors for long life, the air chamber expands and contracts to accommodate weight of fabric. Simple and easy to install, Zip Strip vinyl trim insert is compatible with staple system.

- Available in 25 brilliant colors to match any staple system.
- UV and mildew resistant
- Easy to install

## CaMillion Fabric Insert

CaMillion fabric covered inserts are perfect finishing items for any awning staple system. This foam cord is wrapped with Sunbrella awning fabric so awning seams will be finished with the same fabric that is stapled on the the main body of the awning. UV Stabilizers guarantee your awning will last over time. With Camillion you will get a perfect color and texture match every time.

- Sunbrella wrapped fabric guarantees uniform look for any awning
- Hollow PVC core provides flexibility
- UV resistant fabric
