RETRACTABLE AWNING

5-DAY TURNAROUND

INSTALL MORE AWNINGS IN RECORD TIME

CUSTOMIZED AWNINGS

To fit your customers' needs

- Up to 36' wide and 16'6" max projection
- Custom sizes available down to 1/4 of an inch
- Quality Fabrics by [sunbrella™](#)
- Motors and automation options by [somfy.](#)
- Sold as complete Ready-to-install kit, frame only, or replacement fabric.

FABRIC SERVICE

Don't do it yourself. Trust our Experts.

Utilizing our fabric services allows you to save time and space in your shop, so that you can focus on making sales.

Perfectly squared fabric will save you install time and avoid the need to make last minute adjustments.

SELLING MADE EASY

In this booklet we cover everything you need to sell awnings, from the benefits of buying a complete Sunsation awning, to our superior sewing services and highest-quality parts, and all the upgrades you can offer your customers.

Use our pricing guide on pages 6-11 to calculate your selling price. All prices are listed as our suggested retail price. Contact your sales rep for your cost price.

As your partner in selling Sunsation Awnings, we are here to answer all your questions and give you the information and the confidence you need to sell more awnings, retain happy customers, and most importantly — beat your competition.

AWNINGS

MODELS & COMPONENTS

SUN 3000

Most popular awning
Max projection 13.1 feet
Max width 24 feet

SUN 5000

Industrial heavy duty awning,
designed for commercial use.
Max projection 16.6 feet
Max width 36 feet.

SUN 8000

DROP ARM WINDOW AWNING

Wall brackets are spring-loaded to keep fabric tight at all possible angles.

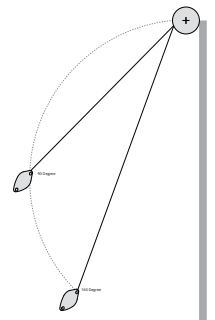

The ES32 Bracket Connector allows arms to be partially hidden under the awning or can extend them up to 6 inches wider than the profile for maximum mounting configuration.

Drop arm awnings are designed for inner frame mounting or front wall mounting.

Can be automated with a Somfy motor or with a manual roller gear.

Can open
from 0°
to 160°

Extend the life of your awning fabric and motor with a **hood cover** that protects against wind, rain, debris, mold and mildew.

Arms are made of extruded aluminum and use twin cables for added strength. These cables are made of stainless steel and covered with PVC, which allows heavier tension and longer outdoor life, even under the most extreme outdoor conditions.

Our **roller tube** is made of corrosion resistant aluminum. It installs more easily and provides less stress on the bolts and frame - so it lasts longer too!

Reach up to 36' width when using a **center bracket** for extra support. The two roller tubes are connected with only a 1" gap. (24' standard max width)

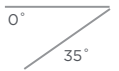

Roller support comes standard with all models 18' or wider to ensure superior strength and durability.

The super-efficient **roller gear** is truly top-of-the-line. That means less strain in both motorized and manually operated models - and many years of trouble-free use!

16' 6" Max Projection
With the 5000 series

The newly designed front **profile** makes for a straighter awning, and gives a crisp, distinctive style to the overall appearance.

Many **valence styles** are available, with an extensive variety of fabrics, both solid colors and stripes.

A **level** is added to each arm where it is attached to the front profile. This unique addition makes installing your awning easy and accurate within minutes.

Arm-Pitch Control is made of corrosion resistant extruded aluminum, far superior to the industry standard of aluminum die casting. Additionally, with its unique self-pitch feature, homeowners will be able to adjust the self pitch to their desired height by simply cranking the gear at the Pitch Control.

Sun 3000 - Frame only

All prices listed are MSRP. Please consult your S&F sales rep for your dealer's discount
